BRUCE N. YAMASAKI, LIBRARY DIRECTOR, RETIRES

Since becoming Director of the Parklawn Health Library (PHL) System in October 1985, I have prepared the lead topic for each issue of our PHL Monthly Bulletin. During these past 13 years, PHL has migrated from a card catalog to an online catalog, and from on-site to desktop access to our resources, publications, and services. I am fully confident that in the years to come the PHL management team will continue to implement cost-effective information technologies to serve you evermore quickly and effectively.

I take this opportunity to thank my dedicated staff, past and present, for their outstanding daily accomplishments that made our dreams a reality during my tenure. I also thank you, our readers, for your loyal patronage and support throughout the years. With my date of departure now imminent, it seems only fitting that I select 'Retirement Planning' as my last Bulletin topic.

Bruce N. Yamasaki
 Director,
 Parklawn Health Library System

CANCER INCIDENCE AND MORTALITY

Although cancer is a collection of more than 100 diseases, the American Cancer Society reports that four cancer sites account for most of the cancer diagnoses and deaths in the United States. It is estimated that in 1998, lung, female breast, prostate, and colorectal cancers will account for 54.2% of all new cases and 53% of cancer deaths. The American Cancer Society, the National Cancer Institute and the Centers for Disease Control and Prevention, including the National Center for Health Statistics, produced an annual "Report Card" to the nation on progress related to cancer prevention and control in the U.S. This report indicates that from 1990-1995, death rates for the four major cancers decreased significantly and the cancer incidence rates decreased on average 0.7% per year.

CLINICAL DATABASES

Clinical databases may be defined as electronic data banks which systematically collect, store, use, and disseminate a huge volume of uniform data sets in electronic form. The literature indicates that health services research on databases was relatively new in 1989. Since that time, however, large clinical databases have proliferated the health care field. Research indicates that examples of this growth include: the Medicare claims database on enrollees; large pharmaceutical databases that typically store billions of prescriptions; and managed care organizations databases that collect several types of clinical and accounting data. AHCPR recently supported The Sixth Regenstrief Conference entitled "Measuring Quality, Outcomes, and Cost of Care Using Large Databases."

NATIVE AMERICANS AND ACCESS TO HEALTH CARE

The Administration for Native Americans (ANA) promotes the goal of social and economic self-sufficiency of American Indians, Alaska Natives, Native Hawaiians, and other Native American Pacific Islanders. Self-sufficiency is that level of development at which a Native American community can control and internally generate resources to provide for the needs of its members and meet its own economic and social goals. Health care presents unique challenges to this goal as a result of shortfalls in Federal funding, modifications in state and Federal health and welfare programs, and increased involvement with managed care organizations. Current literature discusses these challenges to the future of Native American health.

NICOTINE ADDICTION

Tobacco in the form of cigarettes and cigars as well as smokeless tobacco products is a major public health problem. Statistics show that every year 430,000 deaths in the United States can be attributed to cigarette smoking alone. The literature suggests that dopamine levels in the brain are elevated from the use of nicotine as with other drugs of abuse. Research indicates that by studying the nature of nicotine addiction, specific brain sites can be pinpointed to target addiction treatment and medications. Since the best treatment for nicotine addiction is prevention, NIDA is funding research to help prevent tobacco use. NIDA is also bringing together leaders in nicotine addiction research to identify gaps in knowledge which will in turn lead to treatment of addiction to nicotine.

REINVENTING GOVERNMENT

Since 1990, the management staff of the Parklawn Health Library has selected 10 journal articles per month on innovative management techniques to appear in each Bulletin. First entitled "Total Quality Management," this recurring bibliography was recently renamed "Reinventing Government" to reflect and support the Administration's efforts to create a government that works better and costs less.

SCHIZOPHRENIA IN THE ELDERLY

Schizophrenia is a severe psychiatric disorder characterized by delusions and hallucinations as well as apathy, social withdrawal, and incongruity of emotional responses. The literature indicates that schizophrenia affects about 1% of the elderly population. In the past, many of these patients have ended up in state psychiatric hospitals. In recent years, however, many states have closed their psychiatric hospitals resulting in more than 200,000 elderly schizophrenic patients being referred to nursing homes. Research indicates that these patients can benefit from nursing home living if health care professionals: (1) assess their physical needs as well as their mental state, (2) organize mental health services around nursing home living, and (3) coordinate age related psychiatric, social and voluntary services administered to these patients. NIMH is currently funding research on the cognitive functioning of elderly schizophrenic patients living in nursing homes.

GUIDE TO LIBRARY RESOURCES

DIRECTORY OF PHYSICIAN GROUPS AND NETWORKS. Center for Healthcare Information, Irvine, California, 1998. Ref-Assn W 22AA1/D628633

The Directory of Physician Groups and Networks covers the following types of organizations: IPA's, Physician Hospital Organizations (PHO's), Management Service Organizations (MSO's), Physician Practice Management Companies (PPMC's) and Group practices with 20 or more physicians. The main index is arranged by state. Within each state, the name of the physician group (or network) is listed alphabetically. In addition, there is an alphabetic index by name of physician group. This directory also contains industry overviews, trends and future directions, rankings by size and organization type, glossary of terminology and acronyms, and an index to limited speciality organizations. Each entry contains the following information:

- group/network name
- ownership
- address
- number of physicians
- telephone
- contacts
- type of group
- affiliated hospital
- service area

WORLD GUIDE TO SCIENTIFIC ASSOCIATIONS AND LEARNED SOCIETIES.
Saur, K.G. Munich, Germany, 1998. Ref-Assn Q145/W893

The World Guide to Scientific Associations and Learned Societies is a source for locating associations and societies in the fields of science, culture and technology. This edition contains over 17,000 associations and societies arranged by country, association name, subject and publications. Each entry contains the following information:

- association name
- number of members
- address
- president
- telephone
- general secretary
- telefax
- area of activity
- year of foundation
- details on publications

LIBRARY CLIENTELE

The Parklawn Health Library System serves the following components of the Department of Health and Human Services (HHS):

- Administration for Children and Families
- Administration on Aging
- Agency for Health Care Policy and Research
- HHS Regional Offices
- Health Resources and Services Administration
- Indian Health Service
- National Center for Health Statistics
- National Institute of Mental Health
- National Institute on Drug Abuse
- Office of the Secretary
- Office of Public Health and Science
- Program Support Center
- Substance Abuse and Mental Health Services Administration

LIBRARY MISSION

The Parklawn Health Library, the NCHS Staff Research Library, and the Information Resources Center plan, develop, and administer a national research collection and innovative information programs in direct support of the Department of Health and Human Services.

LIBRARY COLLECTION

The Scope of the collection includes the delivery of health care, health administration, health policy, health services research, health promotion and disease prevention, computer sciences, management sciences, medical sociology, health statistics, international health, epidemiology, public health, mental health, psychiatry and neurology, and substance abuse.
