CHILDHOOD IMMUNIZATION

Vaccination is one of the most effective ways to reduce and eliminate serious diseases that cause morbidity and mortality among children. Because of the increase in childhood vaccinations in the U.S., disease and death from diphtheria, pertussis, tetanus, measles, mumps, rubella and Haemophilus influenzae type b are at or near record lows. Despite the fact that childhood vaccination coverage levels in the U.S. are at an all-time high, approximately one million 2-year-olds are still missing one or more of the recommended vaccine doses.

Monitoring vaccination coverage levels is necessary to identify undervaccinated populations and to evaluate efforts to increase coverage. High coverage levels are needed to maintain and reduce illness, disability and death associated with vaccine-preventable diseases. CDC's National Immunization Survey (NIS) is the primary source of vaccination coverage data for U.S. preschool-aged children. NIS provides ongoing national estimates of vaccination coverage for children aged 19-35 months. This is based on information for the most recent 12 months from all 50 states and 28 geographic areas.

COGNITIVE BEHAVIOR THERAPY FOR MENTAL DISORDERS

Cognitive behavior therapy (CBT) is based on the belief that the way a person thinks about an event determines in part how he or she responds to the event, both in terms of feelings and behavior. The goal of CBT is to help the patient learn to identify and correct erroneous beliefs and systematic distortions in information processing in order to reduce distress and increase efforts to cope. The literature indicates that CBT is effective in the treatment of depression, panic disorder, generalized anxiety disorder, and bulimia nervosa. It has emerged as the treatment of choice for these disorders often proving to be more effective than alternative therapies and

typically longer lasting. Research indicates that there are also indications that CBT may be of use in the treatment of schizophrenia and other psychotic disorders largely as an adjunct to medications. NIMH is currently funding research on the effectiveness of CBT in the treatment of mental disorders.

CONGESTIVE HEART FAILURE

Congestive heart failure (CHF) is a disorder in which the heart loses its ability to pump blood sufficiently to meet circulation needs. The literature indicates that CHF may be caused by hypertension, congenital heart disease, heart valve disease, myocardial infarction, or other heart diseases. A healthy lifestyle, which includes reducing excessive weight, decreasing mental stress, eating a low-fat diet, and eliminating smoking, is critical to maintaining a healthy heart. Research indicates that congestive heart failure is an increasingly common condition which affects approximately 1-2% of the U.S. population. It is responsible for more than 30,000 deaths in the U.S. and about 700,000 hospitalizations per year. NCHS has published data on congestive heart failure in *Health, United States 2000*.

HEALTH INSURANCE COVERAGE FOR NEW GENETIC TECHNOLOGIES

New genetic technologies are becoming increasingly important as predictive as well as diagnostic technologies. The literature indicates that health insurers play a critical role in the introduction, utilization, and dissemination of these new technologies. If insurers refuse to cover them, the technologies are less likely to be used. Research indicates that several factors influence health insurers' decisions to cover new genetic technologies. The safety and efficacy of new gene therapies and the validity of genetic tests are the primary factors influencing coverage. In addition, lower costs, approval of the medical community, and consumer demand are other factors associated with increased coverage. AHRQ has recently funded a study looking at factors which currently influence health insurers' decisions to cover certain kinds of new genetic technologies.

NATIONAL HOUSEHOLD SURVEY ON DRUG ABUSE

Data from the newly released 1999 National Household Survey on Drug Abuse shows that the decline in illicit drug use among young people aged 12-17 that began in 1997 continued through 1999. Illicit drug use among the overall population 12 and older remained the same. The literature indicates that although illicit drug use among teens has declined, the younger a person is when first trying marijuana, the greater the risk of drug dependency later. Research indicates that parents and teachers are the strongest link in the battle to keep young people substance-free. SAMHSA, the creator of the survey, is continuing to work on methods to keep the nation's youth drug- and alcohol-free.

ORGAN DONATION

Due to the critical shortage of organs for transplantation, thousands of potential recipients await organs. Many others die while waiting. The literature indicates that a variety of mechanisms exists

through which a person may express the wish to be a donor. However, organs will normally not be procured unless the family of that person agrees to donation. Research indicates that 69-75% of adults are willing to become organ donors but half of the families asked to consider donation do not give their consent to the procedure. The Division of Transplantation, HRSA provides funding support for the nation's organ procurement, allocation, and transplantation system; coordinates national organ and tissue donation activities; and funds research to learn more about what works to increase donation.

REINVENTING GOVERNMENT

Since 1990, the management staff of the Parklawn Health Library has selected 10 journal articles per month on innovative management techniques to appear in each Bulletin. First entitled "Total Quality Management," this recurring bibliography was renamed "Reinventing Government" to reflect and support the Administration's efforts to create a government that works better and costs less.

61. ABATEMENT OF BUSINESS RISK IS KEY TO SIX SIGMA. Harry, MJ. *Qual Progress* 33:72-6, July '00.
62. BUILDING A BETTER DOCTOR. Murti, G. *Qual Progress* 33:43-51, June '00.
63. LESS GOVERNMENT, MORE SECRECY: REINVENTION AND THE WEAKENING OF FREEDOM OF INFORMATION LAW. Roberts, AS. *Public Admin Rev* 60:308-20, July-Aug '00.
64. OBSTACLES TO IMPLEMENTING QUALITY. Salegna, G. *Qual Progress* 33:53-7, July '00.
65. PRESIDENT'S QUALITY PROGRAM HONORS GOVERNMENT ORGANIZATIONS. Mehta, PV. *Qual Progress* 33:57-62, Aug '00.
66. QUESTIONS LEAD, ANSWERS FOLLOW. Harry, MJ. *Qual Progress* 33:82-6, May '00.
67. REINVENTING GOVERNMENT: THE CASE OF NATIONAL SERVICE. Lenkowsky, L. *Public Admin Rev* 60:298-307, July-Aug '00.
68. SATURN'S SUPPLY-CHAIN INNOVATION: HIGH VALUE IN AFTER-SALES SERVICE. Cohen, MA. *Sloan Manage Rev* 41:93-101, Sum '00.
69. A TRANSFORMATION TO QUALITY GOVERNMENT. Clark, TJ. *Qual Progress* 33:117-9, May '00.
70. A TRIO FOR QUALITY. Schyve, PM. *Qual Progress* 33:53-5, June '00.

SELECTED NEW ACQUISITIONS

To permit review of all books and reports in this list, they will not be circulated until three weeks from the date of this Bulletin. All materials are available for review on the NEW BOOKS display shelf near the Service Desk of the Library. You may reserve any book simply by completing the yellow strip form available on the display shelf.

GUIDE TO LIBRARY RESOURCES

WOMEN AND HEART DISEASE; AN ATLAS OF RACIAL AND ETHNIC DISPARITIES IN MORTALITY. Office for Social Environment and Health Research, West Virginia University, Morgantown, WV, 1999. Ref-Gen WG 16 W842

This book supports the President's *Initiative to Eliminate Racial and Ethnic Disparities in Health* and addresses the importance of reducing heart disease in all women. It is a collection of both state and national maps using data collected by the Centers for Disease Control and Prevention, Office of Minority Health, and Office of Women's Health. The majority of the volume is arranged by state with breakdowns of the heart disease death rate by ethnic group. Maps presented in the first part of this book include:

- Geographic distribution of population
- Cardiac rehabilitation units
- Cardiovascular disease specialty physicians
- Total population per coronary care unit bed

THE NATIONAL DIRECTORY OF PHYSICIAN ORGANIZATIONS. Managed Care Information Center, Manasquan, NJ, 2000. Ref-Assn W 22AA1 N21326

This directory provides detailed profiles of physician hospital organizations (PHOs), independent practice associations (IPAs), management service organizations (MSOs), physician practice management companies (PPMs), and other physician networks and groups. Information provided about each physician organization includes:

Physician organization type	Key executives
Organization profile	Physician statistics
Specialities provided	Market analysis
Organization functions	Affiliated/participating hospitals/health systems

LIBRARY CLIENTELE

The Parklawn Health Library System serves the following components of the Department of Health and Human Services (HHS):

- Administration for Children and Families
- Administration on Aging
- Agency for Healthcare Quality and Research
- HHS Regional Offices
- Health Resources and Services Administration
- Indian Health Service
- National Center for Health Statistics
- National Institute of Mental Health
- National Institute on Drug Abuse
- Office of the Secretary
- Office of Public Health and Science
- Program Support Center
- Substance Abuse and Mental Health Services Administration

LIBRARY MISSION

The Parklawn Health Library, the NCHS Staff Research Library, and the Information Resources Center plan, develop, and administer a national research collection and innovative information programs in direct support of the Department of Health and Human Services.

LIBRARY COLLECTION

The Scope of the collection includes the delivery of health care, health administration, health policy, health services research, health promotion and disease prevention, computer sciences, management sciences, medical sociology, health statistics, international health, epidemiology, public health, mental health, psychiatry and neurology, and substance abuse.
